

Modular XP System

Care & Maintenance

We are confident that you will be happy with your ramp system for years to come; but, to help keep the product in excellent condition please follow these tips.

- Keep ramp clean and free of debris.
- If ice or snow accumulates on ramp, do **NOT** use **metal** objects or **rock salt** to remove. Instead, use plastic shovel or non-corrosive ice melt.
- Every three months (or with each season change) check hardware to be sure all is secure. Also, check legs to see if they need adjusting due to settling.

Please, do not hesitate to call us @ **1-800-554-RAMP**(7267) if you have any issues or concerns regarding your ramp system.
